Real-Time Field Patient Documentation

TAKE THE FEAR OUT OF FIELD DOCUMENTATION!

Simple, intuitive user interface allows field crews to enter patient data quickly and easily, in a straightforward application.

emsCharts Mobile functions as a field supplement to the emsCharts web-based charting program. The feature-rich application allows EMS providers to use tablet computers in the field accessing powerful features such as rapid-entry mode, protocol driven wizards, and advanced calculation tools. Page-by-page validations indicate required fields, so nothing is missed.

Age and gender-specific body diagram on a 360° rotating axis enables detailed secondary survey documentation.

The burns tool provides crews with the ability to draw the affected area and thickness, while a calculator simultaneously reports burn percentages and fluid requirements.

Agency-configured protocols are quickly accessible via the slide in/out protocol window. From here, crews can follow a protocol-prompted style of procedures documentation, if they choose.

FEATURES AND FUNCTIONALITY DESIGNED WITH YOUR SPECIFIC NEEDS IN MIND

For the Provider

- Easy and Intuitive - Everything that you need at your fingertips!
- Color-coded fields let you know which are required
- Useful tools such as burn charts and drug calculators
- Medical report screen that builds itself from data in the PCR
- Built-in protocol guides help you complete the call and the PCR
- Chart templates to make documentation easier and faster

For the Administrator

- Total control over the service configuration
- Unlimited application downloads - no end-user licensing
- Automatic software updates for hassle free maintenance
- Administrative web tools to assure standardization of data
- Increased signature compliance
- Securely uploads data to emsCharts.com in real time

System Requirements

Operating System: Microsoft® Windows® XP Professional, Windows® Vista, Windows 7 (32 and 64 bit)
Processor: 1 GHz Intel Pentium III Processor or higher • Memory (RAM): 2GB • Disk Space: 300 MB • Display: 800 X 600 resolution
